

Recommendation Letter

Dear reviewer,

It is a pleasure to recommend Yuri Pereira Ramos for performance demonstrated during his work as web developer Front-end for CAPGOV, where he proved to be a valuable performance.

I know Yuri Ramos 5 years ago, in which I worked as its Project Manager. He participated in several projects under my leadership as the creation of CAPGOV portal, a portal that provides all government technology projects that our company has a contract and also CAPGOV panel, a daily-updated panel that displayed all tasks of all projects in its current status (done, waiting or refused) with Agile Scrum.

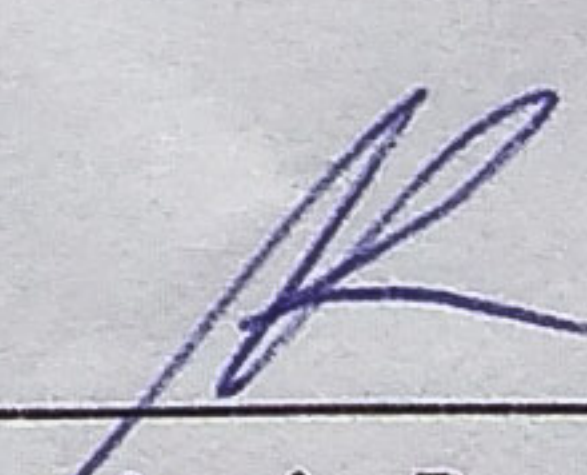

Based on his work, I would say he was one of the best front-end developers who already had presented an excellent job in carrying out the reports and demonstrated an extraordinary ability through their analytical and communication skills.

Through the performance shown in our company, we believe he will be an acquisition that will add up your team or in your university.

I put myself at the disposal to provide any further information.

Best regards.

Rio de Janeiro, February 3, 2016.
